Summary of Skills

- Able to read and understand electrical and hydraulic schematics
- Comfortable with different types of machinery and safe operating techniques
- Extensive mechanical knowledge and technical skills
- Mechanical, hydraulic and electrical troubleshooting
- Exceptional time management skills
- Comfortable in a leadership role

Certifications/Training

- Working at Heights
- Advanced Rescue - Hub
- Advanced Rescue - Nacelle
- First Aid and CPR
- Fire Awareness
- GWO Training

Work Experience

- **Siemens Energy** (2024-2025)
 - **Wind Turbine Maintenance Technician**
 - Perform regular maintenance, troubleshooting, and repair of wind turbines, including electrical systems, mechanical systems, and hydraulic components.
 - Replace or repair damaged turbine parts, including blades, motors, generators, and control systems.
 - Document maintenance activities and maintain accurate service records for each turbine.
 - Respond quickly to emergency situations to minimize downtime and maximize operational efficiency.
 - Assist in site monitoring, and remote troubleshooting to onsite teams to resolve turbine faults
- **Vestas** (2022-2024)
 - **Wind Turbine Maintenance Technician**
 - Use safe working practices to perform troubleshooting, routine maintenance, and replacement of components in electrical, hydraulic, and mechanical systems
 - Work is performed at heights, in confined spaces, and in a variety of weather conditions with safety as a main priority
 - Report to Lead Technician with updates on timeline and recommended solutions based on fault analysis results
 - Use appropriate Personal Protective Equipment according to Arc Flash potential

- **Whistler Blackcomb** (2021-2022)
 - **Rental Supervisor**
 - Oversee a team of rental technicians to provide customers with accurately adjusted rental equipment
 - Provide proper training for new employees to manufacturers' requirements
 - Assist rental technicians with daily tasks
- **Cadman Power Equipment Ltd.** (Summer 2021)
 - **Assembler**
 - Assemble varying farming irrigation systems according to engineered blueprints
 - Successfully meet deadlines under time constraints
 - Perform regular maintenance and repair on customer equipment
- **Whistler Blackcomb** (2020-2021)
 - **Rental Technician**
 - Provide guests with rental equipment properly sized and adjusted to their individual specifications according to the manufacturers
 - Work in a fast paced, professional shop to provide the best experience for customers
- **New United Goderich** (Summer 2019)
