PROFILE

Dedicated, personable, and a quick learner, I am a recent graduate of the Ontario Youth Apprenticeship Program and have since gained valuable experience as an Industrial Mechanic Millwright Apprentice.

Having worked since age 11, my early exposure to different work environments has taught me the importance of responsibility, time management, and effective communication. Over the years, my interest shifted towards the skilled trades, particularly machining and mechanical work. This led me to pursue an Industrial Mechanic Millwright Apprenticeship, where I am currently applying my skills to solve complex mechanical problems and contribute to maintaining and improving industrial systems.

My mechanical abilities also extend back into my earlier years of motocross racing where I performed maintenance on my dirt bikes. My skills came in handy whether it came to off track regular upkeep of my motorcycles or, in high pressure situations, where I needed to make a quick fix in my settings or swiftly resolve a mechanical issue. Currently, I conduct maintenance on my car, which allows me to learn innovative ways of approaching difficult mechanical problems.

I am also committed to continuous learning and professional development. I have successfully completed the first level of my millwright apprenticeship, gaining both hands-on experience and technical knowledge that has deepened my understanding of mechanical systems. During this time, I have not only learned about machinery installation, maintenance, and troubleshooting but also developed a strong foundation in safety practices and efficient problem-solving.

I am eager to continue my education and hands-on training to advance to the next level of my apprenticeship, with the goal of achieving my Red Seal certification as a Journeyman Industrial Mechanic Millwright.

In my spare time I am committed to maintaining a challenging fitness regimen combined with a healthy lifestyle.

I am excited about the future and the opportunity to further build on my skills, knowledge, and expertise in this field.

CALVIN KOENIG

Industrial Mechanical Millwright Apprentice

EDUCATION

- Clarington Central Secondary School – Graduated June 2024
- Level 1 Millwright – Ontario Youth Apprenticeship Program (OYAP)
- Working At Heights
- WHMS
  Lock Out/ Tag Out Procedures
- Forklift Operating license

WORK EXPERIENCE

Butt & Son Millwrighting and Welding – Level 1 Millwright Apprentice
January 2024 – Present

- Support installing machinery and equipment such as pumps, conveyors, motors, and other mechanical systems.
- Assist with disassembling / reassembling equipment during repair or maintenance.
- Assist with adjusting and calibrating machines to ensure proper functionality.
- Use measuring instruments such as micrometers, calipers, and tape measures to ensure accurate dimensions for mechanical parts.
- Assist in routine inspections of equipment; checking for signs of wear, damage, or misalignment.
- Shadow experienced millwrights and gradually take on more complex tasks as skills improve.
- Experienced in different welding applications such as:
  - Gas Metal Arc Welding
  - Gas Tungsten Arc Welding
  - Shielded Metal Arc Welding
  - Computer Controlled Metal Arc Welding
  - Oxy-acetylene Welding

Subcontracting history and experience:

Contractors

- JR Millwrighting and Fabrication
- Elite Industrial Millwrighting

Industrial mills and plants

- Atlantic Paper Packaging (Whitby)
- New Forest Paper Mill (Scarborough)
- Ball Packaging Products (Whitby)
- Ball Packaging Products (York)
- Mondelez Cookie Factory (Scarborough
- AGS Automotive Systems (Oshawa)

Sport Check – Hard Goods Advisor
September 2023 – January 2024

Canadian Tire – Part-time Automotive Customer Associate
April 2023 – August 2023

Chris Duff Electrical and Plumbing
September 2022 - January 2023 (Co-op) / July – August 2023 (Casual Labour)

- Assisted with fixing electrical components and plumbing issues.
- Cleaned tools, parts, work areas.
- Gained knowledge and experience from a Master Electrician & Plumber
- Wired various receptacles and outlets in residential establishments.
- Assisted with the installation of numerous plumbing work such as:
  - Hot water tanks
  - Pressure pumps
  - Sinks and bathtubs
  - Toilets
  - Septic tanks
  - ABS, PVC, Pex, Flexi, and Copper pipes

SKILLS

- Mechanical
- Tool Proficient
- Measurement and Precision
- Blueprint and Schematic Reading
- Problem-Solving and Troubleshooting
- Preventive Maintenance
- Welding and Fabrication
- Safety Awareness
- Teamwork and Communication
- Automotive and motorcycle maintenance proficient
