**January 21, 2026**

To whom this may concern,

I am writing to express my great interest in this position. My experience completing my Millwright 433A Apprenticeship hours with Jenico Complete Ltd. has provided me with the necessary skill set to succeed in this position. Presently, I am preparing to write the certifying Industrial Millwright exam with Skilled Trades Ontario.

I believe I can be an asset to your company by bringing an extensive knowledge of pneumatic and hydraulic systems and the ability to read and relay schematic designs. In combination with these skills, my experience has allowed me to widen my repertoire of preventative maintenance techniques and rely on my knowledge to perform successful troubleshooting measures.

Throughout my apprenticeship, I expanded on my in-class education from Durham College by applying learned skills on the daily. These included installing and manufacturing machinery, maintenance on pneumatic valves and working with robotic welding equipment. Throughout these processes, I have been required to learn about both the preventative maintenance and to also be able to diagnose issues within the mechanics. This job has also taught me the ability to work quickly, efficiently and be adaptable to change as we often went on international installs with moments notice.

However, even with the experience I have been grateful to receive, I recognize that I have a great deal to learn and must prove myself every day on the job. I am eager to expand my knowledge from more experienced individuals to continuously strive for improvement in my day-to-day job responsibilities.

Thank you for your time and consideration for this position.

Sincerely, **Colin Prikker**
