

DOMINIC SIMSER

647.554.8749 · dominicsimsers65@gmail.com 📍 Durham, ON

Highly motivated, energetic and results oriented individual looking to secure a Plumbing Apprenticeship opportunity with a company where I can both utilize my skills and experience while adding value to my employer and myself.

Skills

- Tools & Materials – introduction to hand and power tools and how to use them safely as well as measurement instruction.
- Plumbing Safety – electrical safety requirements of the Occupational Health and Safety Act, safe work practices and procedures, torch safety.
- Plumbing Codes – basic rules and regulations of Part 7 (Plumbing) of the Ontario Building Code, how the code is organized, how to identify new rules, the scope and objectives of administrative requirements, tables and appendices.
- Blueprint reading – correct methods of completing drain plans and stack elevations, information from architectural, structural and mechanical drawings, specifications and the building code to complete plumbing installations for a single dwelling.
- Plumbing Installation Methods – installation procedures for ABS and PVC DWV, cast iron soil pipe, copper, steel, and PEX.

Education

Plumbing Pre-Apprenticeship Program
Herzing College, ON

- Learned and developed the ability to use plumbing power and hand tools safely and responsibly.
- Ability to identify, interpret, and apply applicable acts, regulations, and codes.
- Gained knowledge in various aspects of servicing, repairing and installation through hands-on training (gas, propane, oil fired burners, furnaces, boilers and hot water heaters)
- Installed a 3-piece bathroom, including toilet, sink, bathtub, venting, and drainage (all up to code)
- Ability to read blueprints and building specs to complete a plumbing installation for a single dwelling.
