## Objective

---

Motivated and hardworking graduate of Humber College's Mechanical Techniques – Millwright program seeking an opportunity to contribute to building and equipment maintenance while continuing to develop hands-on technical skills. Dedicated to safety, precision, and continuous learning in a professional maintenance environment.

## Education

---

### **Mechanical Techniques – Millwright**

Humber College, Etobicoke, Ontario

Graduated: April 2025

- Gained practical experience with hand and power tools as well as precision tools like calipers and dial indicators, while completing machinery maintenance and lab assignments
- Developed skills in blueprint reading, welding, machining, and mechanical systems
- Completed safety certifications and actively engaged in training to understand workplace safety requirements and best practices
- Awarded Dean's List honors for maintaining an 84% cumulative average

## Work Experience

---

### **Customer Service & Kitchen Associate**

The Chicken Coop Restaurant and Bakery – Greenbank, Ontario

July 2021 – August 2024

- Managed customer orders, prepared food, while maintaining cleanliness and safety standards
- Prioritized conflicting demands, demonstrating reliability, time management, and teamwork in a fast-paced environment
- Operated the cash register and supported customer retention by processing customer orders efficiently and accurately. and maintaining friendly, efficient service during high-traffic periods
- Demonstrated reliability by frequently filling in for coworkers and adapting to different roles and tasks where needed

## **Independent Landscaping & Property Maintenance**

Self-Employed - Greenbank, ON

May 2025 - Present

- Completed residential landscaping and property maintenance projects including lawn care, garden maintenance, debris removal, and seasonal cleanup
- Used hand and power tools safely and efficiently to complete physical outdoor work
- Demonstrated reliability, time management, and strong work ethic through consistent client satisfaction

## **Skills**

---

- Equipment maintenance and inspection developed through routine lab work, ensuring machines operated safely, reliably, and efficiently
- Strong proficiency with hand and power tools through machining, fabrication, assembly, and repair tasks during college training
- Built strong foundational welding and fabrication skills through college training, reinforced by years of welding experience as a hobby and during high school courses
- Developed strong blueprint reading skills through interpreting mechanical drawings for lab assignments and fabrication projects
- Showcased accountability and critical thinking through balancing hands-on workload, deadlines, and troubleshooting in school and past job experience
- Demonstrated strong safety awareness through WHMIS and Working at Heights training, applying proper procedures in lab and shop settings

## **Certifications**

---

- WHMIS, (CCOHS), November 2025
- Working at Heights, (IHSA), April 2025
